## Oggetto: 50th Anniversary of Veco Fonderia Smalteria SpA

Dear customers, suppliers and all our collaborators,  
tomorrow 16<sup>th</sup> April 2011 we are proud to commemorate the fifty years since the birth of the Veco foundry of Martinsicuro by the founders Engineer Francesco Vecchiotti and Mrs. Adele Colombo Vecchiotti.

A company that over the years has worked actively for the advancement and improvement of the economic conditions of individuals and communities.

We cannot forget the origins of the company that casted and polished millions of pieces for sanitary and domestic use that reached every corner of the world.

The evolution of time has seen us changing our productions arriving to produce gray and nodular iron for different markets at the highest levels of quality and safety.

Today we are again and fiercely committed to accept a major challenge with the future so that we can still be protagonists in the difficult field of manufacturing; we are sure that the relevant investments we are placing in act will still allow us to be your appropriate partner and primary reference on the market.

Therefore we hope to be able to count on your preference and support certain that you also want to share this important milestone not as an arrival point but as a start for a better future.

Best regards.

Managing Director  
Anna Vecchiotti
